NEXT II™ Equine DR

The Best Selling Equine DR System in History

NEXT II™ Equine DR contains everything you need in a portable DR system. The industry first monitor elevation system enables and enhances image review and communication with clients while standing, improving client communication and diagnostic confidence when making tough decisions in the field. Featuring an all-new rugged 14" tablet workstation that's designed to acquire images in even the harshest conditions, as well as an improved, stronger hard-side carrying case.

Tele-View equine dental camera

The Tele-View Equine Dental Camera is an innovative product that allows equine practitioners to easily image teeth and gums of equine patients. The live image can be viewed on Windows computer, laptop, tablets, and also Android™ and Apple® cell phones and tablets. This innovative product includes a high definition sensor, LED lights and a water channel (to clean the sensor window). These components are incorporated into a stainless steel housing.

Sound equine ultrasound systems

Versana Active™ ultrasound system delivers the imaging capability of a console in a hand-carried, lightweight package that enables you to actively take your system to your patients, on premises or remote facilities. This reliable system brings the agility of a laptop unit with capability for attaching it to a cart. Adaptable to cover a broad range of everyday exams, it is easy to carry bringing care directly to your patient.

Tele-View equine endoscope/gastroscope

The Tele-View USB Video Endoscope/Gastrosopes are simple endoscope systems that are quick and easy to use. Just install the software on your computer and attach the USB connector to view the endoscope procedure on the computer screen. Easily record the procedure to the computer's hard drive. With this innovative design, there is no need for a processor, light processor, special monitor, or a storage rack. Excellent for mobile or in-clinic endoscopy.

The Tele-View USB Endoscopes come in 1.0m, 1.5m, 3.0, lengths with 8.7mm, 9.8mm or 12.6mm diameters. The insertion tube includes a high resolution camera sensor, super-bright LED lights, a working channel, an irrigation channel to clean the lens, and an air-water channel for lavage or insufflation. Now you can quickly and easily complete endoscopic procedures without the hassles and expenses of complicated equipment.

RLT – regenerative laser

SOUND® is committed to continually refining its product line to meet the demands of the equine veterinarian. The release of the SmartRLT Sport marks our 3rd evolution of regenerative laser since our introduction of RLT technology in 2012. After 500,000+ treatments, 40,000+ horses, and 500+ Winners, the RLT technology has lived up to that promise again and again.

HDE – Horse Dental Equipment – complete turnkey solution

Manufacturer of the latest generation power equipment, HDE designs products specific to equine dentistry, guaranteeing products adapted for your needs.

- Comfort and user-friendly
- Lightweight, easy-to-handle and noiseless, the material guarantees comfort and ease when you are operating.
- Ergonomic and user-friendly, the material is respectful of the human form.
- Wireless material guarantees greater autonomy while using: one can work on up to 10 horses without recharging the EVOLUTION battery.

The EVOLUTION motor's automatic clutch protects your equipment and your patient. Little to no maintenance: the system that we use requires no lubrication after use.

Turnkey solutions

Horse Dental Equipment offers turnkey sets consisting of a motor, a drive shaft, and drills. A single organizer for your equipment, it is so much simpler!

These sets are adapted to the main user's profile. The following link will guide you in choosing:
